CREOLE INC. Haiti

2026
IMPACT REPORT

Growing opportunity through agriculture, education and local leadership in Haiti

TRACTOR SERVICES • SEED PRODUCTION • FARMING OPERATION • STUDENT INTERNSHIPS • EDUCATION

2026

Helping farmers bring more land into production

Mechanized services provide timely land preparation, helping farmers cultivate more land and improve production.

220

Farmers served

230

Acres prepared

30

Acres harvested

Harvesting rice for farmers

Plowing farmer’s Field

Why it matters

Access to reliable tractor services can reduce the burden of manual land preparation and harvesting, help farmers work larger areas, and support more timely planting.

Building local access to quality seed

Producing seed locally is an important step toward stronger farm productivity and greater agricultural self-reliance.

11,000 kg

BEAN SEED

Locally produced for future planting and distribution.

Drying Black Bean seeds

8,000 kg

SORGHUM SEED

Locally produced to support access to an important food crop.

Cleaning sorghum seeds

2026 seed production total: 19,000 kg

Next opportunity: strengthen seed multiplication, quality control and farmer access.

A working farm. A model for what's possible.

Creole's farm is the center of project operations and a practical example of mechanized agriculture. Farm production generates revenue for the project and contributes to our goal of long-term sustainability.

The farm demonstrates how equipment and practical production can work together.

INVESTING IN THE FUTURE

A new nursery is being developed to grow hardwood and Breadfruit trees.

Learning by doing

Creole’s farm provides a practical setting for university students to connect classroom knowledge with real agricultural operations.

6

University students

Participated in 2026

University Students training

A field-based learning experience

- Observe and participate in farm operations
- Build practical agricultural skills
- Learn from Haitian farm staff and local experience
- Explore pathways in agriculture and agribusiness

Mango Bridge Elementary School

Investing in education helps create opportunity beyond the farm and supports the next generation of Haitian leaders.

Classroom

A commitment to the next generation

Creole's support for Mango Bridge Elementary School reflects a broader commitment to education and community development. The school was launched in 2016 with support from Creole, including land and start-up resources.

120 Elementary Students served in 2025/2026

WHAT THE WORK ADDS UP TO

Strengthening the agricultural ecosystem

Each activity contributes to a broader goal: stronger local capacity, better access to opportunity and a more resilient food system.

FARMERS

More access to mechanized services

LOCAL PRODUCTION

Locally produced bean and sorghum seed

NEXT GENERATION

Students gaining practical experience; children supported through education

The long-term aim: Haitian-led agriculture that creates livelihoods, strengthens food security and builds local expertise.

THE YEAR AT A GLANCE

Practical work. Measurable progress.

In 2026, Creole connected farm services, local seed production and student learning.

220
Farmers served

260
Acres serviced

45 Tons
Sorghum grain

12.5 Tons
Kenaf

19,000 kg
Seed produced

11,000 kg beans + 8,000 kg sorghum

Served

A connected approach

Creole's work links agricultural production with services for farmers, hands-on learning for students, and educational opportunity for children.

LOOKING AHEAD

Build on the progress. Expand the impact.

Creole will continue strengthening the practical systems that help farmers, students and communities move forward.

01 **Expand reliable tractor services and reach more farmers**

02 **Increase seed production and improve seed quality**

03 **Revitalize and expand the Land Share program**

04 **Strengthen university internships and hands-on training**

05 **Document and communicate Mango Bridge's educational impact**

Thank you to our farmers, partners, students, staff and supporters.

WITH GRATITUDE

Thank you for believing in our work.

To our donors, sponsors and partners: your generosity makes it possible for Creole to serve farmers, produce local seed, create learning opportunities for university students and support education in our communities.

Your continued support matters.

Please continue standing with Creole as we expand our work, reach more farmers, strengthen local agriculture and invest in the next generation. Together, we can build lasting opportunities in Haiti.

Continue Growing with Creole! Donate Today!
